# HOUSEKEEPERS: Please read the following carefully To Whom It May Concern:

We, the undersigned, herewith certify that on September 1, 1899, we baked a barrel of CERES FLOUR to test the yield in quantity, and obtained 320 loaves of magnificent light and white bread of one pound each.

Although we are large bakers and have baked thousands of barrels of flour into bread, we freely confess that this is the largest and best output we have ever obtained from any flour.

We acknowledge CERES FLOUR to be without a peer in quality, and the result obtained in point of output is simply phenomenal.

### The above certificate explains itself

We have offered "CERES" Flour to the public for over 30 years, it has been making friends right along, and today it is acknowledged by the strongest competition that it is the best flour made.

There are many other good flours on the market, some for a little less money than "CERES" Flour, but there is not one of them that can begin to compete with it in quality, nor produce as many loaves of bread per barrel.
